25X1

1. The planned consumption of limestone in the furnaces of the Nowa Huta foundry is 53 - 56 kg. per ton of pig iron. The planned consumption of coke is 1250 kg. per ton of pig iron. The production plan for pig iron for 1954 is 184,000 tons (about 200,000 in terms of pig iron "przeliozeniowa"(sic)). The production plan for coke for 1954 is estimated at 292,000 tons. This figure was arrived at after a three months¹ trial.

2. The following mines are to deliver charges for the coking plant (Einsatz):

Gliwice	15%
Viktoria	15%
Anna	35%
Emma	35%

The total coal charge will be 389,000 tons; i.e., 1,340 kg. of coal per ton of coke.

3. The iron foundry produces cast iron exclusively. The production plan for 1953 is 6,000 tons and for 1954, 22,000 tons.
4. The plant for refractory goods in the Nowa Huta foundry is expected to be put into commission between 1 September 1953 and 1 November 1953. There is good reason to believe that this time limit will be kept. The production plan for 1954 is as follows:

Refractory goods	32,000 tons
Silicious earth products	18,000 tons
Refractory mortar (zaprawa)	16,000 tons.
